ICPSR PROCESSING NOTE FOR # 31481
2008 National Asian American Survey

ICPSR Notes

1) **Value Labels:**
   - For consistency, ICPSR has added value labels according to the codebook deposited by the principal investigator.

2) **Data File Conversion:**
   - ICPSR converted the original STATA data file into a STATA Version 9 data file for processing purposes. No changes were made to the data because of this.

Principal Investigator Notes

1) **Confidentiality:**
   - To help protect confidentiality of subjects, any county or state where the relevant national origin group has fewer than 5,000 residents is labeled as "PROTECTED". In addition, any county or state is labeled as "PROTECTED" where the respondent's ethnicity is NOT Asian Indian, Bangladeshi, Cambodian, Chinese, Filipino, Hmong, Japanese, Korean, Laotian, Pakistani, Taiwanese, Vietnamese.

Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values

Variable Name and Label (Total Cases = 5159)		Percent of Cases with Missing Values
99.4% (172 of 173 variables)	have 0% Missing Values	
0.0% (0 of 173 variables)	have 0% - 1% Missing Values	
0.0% (0 of 173 variables)	have 1% - 3% Missing Values	
0.0% (0 of 173 variables)	have 3% - 5% Missing Values	
0.0% (0 of 173 variables)	have 5% - 10% Missing Values	
0.6% (1 of 173 variables)	have 10% - 20% Missing Values	
NWEIGHTNATYRS	National Weight Variable, yrs in us	11.7%
0.0% (0 of 173 variables)	have 20% - 40% Missing Values	
0.0% (0 of 173 variables)	have 40% - 99% Missing Values	
0.0% (0 of 173 variables)	have 100% missing values

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
